Save \$10 for each child if you register with a friend!

### Fast ForWord Programs for summer!

- **Reading Intervention** for children in K through Grade 12.
- The Fast ForWord program develops **brain processing efficiency** through intensive, adaptive exercises. Fast ForWord products offer tested, real-world results for educators and specialists around the globe.
- The Fast ForWord program develops and strengthens memory, attention, processing rate, and sequencing — the cognitive skills essential for **learning and reading success**. The strengthening of these skills results in a wide range of improved critical language and reading skills such as phonological awareness, phonemic awareness, fluency, vocabulary, comprehension, decoding, working memory, syntax, grammar, and other skills necessary to learn how to read or to become a better reader. The gains students achieve are lasting, the result of enduring positive changes in their processing skills and learning capacity.
- 6-8 week summer intensive offered in the comfort of your own home!
